### AVIATEK 011-Aircraft Metal Assembly, Inspection, and Evaluation (CSU) - 4 Units

This course offers a study of metal and non-metal repair procedures, including the materials and methods of fastening by welding, riveting, and other accepted techniques. Instruction is offered in conducting 100-hour inspections. Airframe subjects are reviewed and practice tests are taken in preparation for the FAA written examinations for A&P licensing.

Class No	Component	Start/End Time	Days	Instructor	Room
26274	LEC	8:00 am - 10:10 am	MTWTh	STAFF, W	AT A201

(Starts 10/21/2024, Ends 12/15/2024)

### AVIATEK 012-Aircraft Metal Assembly Inspection and Evaluation Laboratory (CSU) - 2 Units

Instruction and practice is offered in cutting, bending, forming, welding, and fastening metal structures. Plastic enclosures honeycomb and composites are evaluated. Structural repairs using various fastening and bonding techniques are emphasized. Students will conduct a 100-hour inspection on an airframe using the appropriate reference material and correct procedures to determine airworthiness. Students perform General and Airframe practical projects.

Class No	Component	Start/End Time	Days	Instructor	Room
26275	LAB	10:20 am - 1:40 pm	MW	STAFF, W	AT A110

## BASIC SKILLS

### **BSICSKL 005CE-Academic Guidance (Repeatable) - 0 Unit**

Student success begins with understanding one's current basic skill levels, post-secondary education opportunities, educational and career goals and requirements, and developing a strategy for gaining the necessary knowledge and skills to transition into and complete college credit courses with good grades. Students will research and document their educational and career goals and requirements, develop an action plan to achieve them in a specific time frame, and learn to self-evaluate and reevaluate their progress in implementing their action plan and achieving their goals.

### **CHEM 211-Organic Chemistry For Science Majors I (UC/CSU) - 5 Units**

*Requirement Designation: Meets IGETC 5A 5C CSU B1 B3*

**Enrollment Requirement:** CHEM 102

This course is the first part of a two semester organic chemistry course sequence. Students are introduced to organic molecular structures, bonding, nomenclature including conformational analysis, potential energy plots, hybridization, stereochemistry and functional group chemistry, with emphasis on reactions and reaction mechanisms. It also includes the applications of instrumental methods in functional group analysis and identification of molecular structures. In the laboratory students learn the essential skills and techniques of preparation, isolation, purification, and analysis of organic compounds by employing standard and modern instrumental methods. This course also emphasizes the use and interpretation of Nuclear Magnetic Resonance (NMR), Infrared (IR) Spectroscopy and Gas Chromatography (GC) in the analysis and identification of organic compounds. This course is part of the transfer sequence for careers in the physical, biological, and health sciences and a requirement for the Associate of Sciences degree in Chemistry.

### CHEM 212-Organic Chemistry For Science Majors II (UC/CSU) - 5 Units

*Requirement Designation: Meets IGETC 5A 5C CSU B1 B3*

#### Enrollment Requirement: CHEM 211

This course is a continuation of Chemistry 211 with emphasis on the remaining functional groups and aromaticity. Emphasis is put on reactions and reaction mechanisms, stereochemistry, multi-step synthesis of a variety of organic compounds such as aromatic compounds, alcohols, phenols, amines, heterocyclics, aldehydes, ketones, carboxylic acids and their derivatives. The structures, formation and reactions of enols and enolate anions are also studied. The structures and functional group reactions of biological molecules such as carbohydrates, amino acids, polypeptides, lipids and nucleic acids are discussed. The laboratory work presents more techniques of multi-step synthesis, isolation, purification, and analysis of organic compounds using conventional and modern instrumental methods. This course also emphasizes the use and interpretation of Nuclear Magnetic Resonance (NMR), Infrared (IR), Mass Spectroscopy (MS), Ultraviolet (UV), and Gas Chromatograph (GC) in the analysis and identification of organic compounds.

The Chem. 211 and 212 sequence satisfy the one year organic chemistry requirement for careers in the physical, biological, and health sciences and a requirement for the Associate of Sciences degree in Chemistry.

#### Enrollment Requirement: Prerequisite: CHEM 211

The course is designed to provide an introduction to the principles, concepts and terminology of biochemistry, with an emphasis on the structure and function of biomolecules, the role of intermediary metabolism in energy production and common biochemical laboratory techniques. Topics include the chemistry and properties of three groups of biological macromolecules (proteins, carbohydrates and lipids) and their building blocks, protein structure and function, enzyme catalysis, and the details of the central metabolic pathways (glycolysis, glycogenolysis, the citric acid cycle, electron transport, and oxidative phosphorylation) including their regulation and integration. Throughout the course the organizing principles of biochemistry and the distinctive characteristics of the living state will be emphasized. The laboratory exposes the students to a variety of biochemical techniques and how they are used to evaluate biomolecules and biochemical systems. These techniques include spectrophotometry, various types of chromatography, enzyme assays, protein

Corequisite: CH DEV042

Students are assigned to an approved Early Care and Education program to practice and demonstrate developmentally appropriate early childhood program planning and teaching competencies under the supervision of an ECD/CD faculty and other qualified early education professionals. Students utilize practical classroom experiences to make connections between theory and practice, develop professional behaviors, and build a comprehensive understanding of children and families. Child centered, play-oriented approaches to teaching, learning, assessment, and knowledge of curriculum content areas is emphasized as student teachers design, implement and evaluate experiences that promote positive development and learning.

### CIS 229-Introduction To Cisco Network Fundamentals (CSU) - 3 Units

#### Enrollment Requirement:Advisory: CIS 210 and CIS 222

This course is equivalence to Semester I & II of the Cisco Network Academy. Part 1 of this course introduces the architecture, structure, functions, components, and models of the Internet and computer networks. The principles of IP addressing and fundamentals of Ethernet concepts, media, and operations are introduced to provide a foundation for the curriculum. By the end of Part 1, students will be able to build simple LANs, perform basic configurations for routers and switches, and implement IP addressing schemes. Part 2 of this course describes the architecture, components, and operations of routers and switches in a small network. Students learn how to configure a router and a switch for basic functionality. By the end of Part II, students will be able to configure and troubleshoot routers and switches and resolve common issues with RIPv1, RIPv2, single-area and multi-area OSPF, virtual LANs, and inter-VLAN routing in both IPv4 and IPv6 networks. Students completing this course prepared to take the Cisco ICND1 and/or CCENT certification exam.

**COOP ED**

**COOP ED 095-Work Experience - General I (CSU) - 0.5 Unit**

General Cooperative Education is a course where the student will work toward meeting and/or exceeding workplace objectives developed with input from the employer, the student-employee, and the faculty. This course requires that the student be employed in a paid or unpaid (intern) position. The place of employment does not need to be related to the student's educational goals. General work experience may be repeated for a maximum of 16 total units, subject to a maximum of 4 units per one enrollment period. Each 60 hours of non-paid work equals one unit of credit. Each 75 hours of paid work equals one unit of credit. \*Title 5, section 55253 states that a student may earn up to a maximum of 16-semester units or 24 quarter units of General & Occupational work experience education combined (Board Rule 6405.10). Students must work 37.5 paid hours or 30 volunteer hours during the semester to earn half a unit for this course.

### **EDUC 211-Introduction to Educational Issues (UC/CSU) - 3 Units**

*Requirement Designation: Meets IGETC 4 CSU D*

## 2024 Fall Classes

This course serves as an introduction to the broad landscape of public education in the United States. It is applicable to students with interests in educational research, policy, or teaching in both formal and informal educational contexts. The course will provide context to answer the question, 'What is the purpose of public education?' Educators, students, parents, politicians, and community members may have varying answers to this question. Their respective answers have implications for how we organize schools as social and cultural institutions, how we think about teaching and learning, and how we determine the intended outcomes of education. Students will examine this question in relation to contemporary issues in the landscape of public education; understanding education and educational institutions in social, cultural, and historical contexts; and understanding the science of learning and human development in educational settings. The course readings highlight the work of educational researchers from UCLA's Department of Education, especially the ways their scholarship intersects with policy and practice. To complement the weekly reading and class discussion, students will work in groups to identify a real-life problem affecting public education in Los Angeles. Students will study this problem from multiple perspectives throughout the course. The final project involves conceptualizing a socially just solution to this real-life educational problem. Students will be required to conduct a minimum of three hours observing in a public preK-16 classroom setting.

### EDUC 212-Introduction to Inquiry and Research in Education (CSU) - 3 Units

The course offers an introduction to empirical research in education, and how to find, interpret, and evaluate research. Students will learn about different methods of conceptualizing inquiry, framing and asking research question, and gathering evidence to answer these questions, including qualitative (e.g., semi-structured interviews, ethnographies, case studies), quantitative (e.g., correlation, experimental, descriptive, survey), and mixed methods. Lectures, readings, and assignments highlight norms for conducting and reporting different types of research that addresses important questions in the field of education, along with the ethics of conducting research in the social sciences more broadly.

### MATH 270-Linear Algebra (UC/CSU) - 3 Units

*Requirement Designation: Meets IGETC 2A CSU B4*

**Enrollment Requirement:** MATH 261 OR Placement in MATH 270

Math 270 develops the techniques and theory needed to solve and classify systems of linear equations. Solution techniques include row operations, Gaussian elimination, and matrix algebra. Investigates the properties of vectors in two and three dimensions, leading to the notion of an abstract vector space. Vector space and matrix theory are presented including topics such as inner products, norms, orthogonality, eigenvalues, eigenspaces, linear transformations, and diagonalization. Selected applications of linear algebra are included.
