College-Wide Student Learning Outcomes

- ❖ **Critical Thinking:** Analyze problems by differentiating fact from opinions, using evidence, and using sound reasoning to specify multiple solutions and their consequences.
- ❖ **Communication:** In your math papers and on tests you will be expected to show and explain your work in a clear, well-organized manner.
- ❖ **Quantitative Reasoning:** Identify, analyze, and solve problems that are quantitative in nature.
- ❖ **Apply self-assessment and reflection strategies** to learn from your mistakes and to seek better methods to solve particular problems.
- ❖ **Civic Responsibility:** Students are expected to respect classmates as well as the instructor. This includes refraining from disruptive behavior (coming late, leaving early, wandering in and out of class, eating/drinking during class, side conversations, instant messaging, etc) and practicing positive behaviors (cooperation, civility, helpfulness, constructive engagement in class activity).
- ❖ **Technical Competence:** Utilize the appropriate technology effectively for informational, academic, personal, and professional needs.
- ❖ **Ethics:** All students will maintain the highest standards of academic honesty. You may NOT give or receive help on tests or quizzes, and you may not turn in someone else's work as your own. NOTE: If you are discovered committing any act of academic dishonesty (cheating), you will receive no credit ("zero") for the test, quiz, or assignment AND you will be suspended from class AND the case will be referred to the Dean for further disciplinary action. For further information see the WLAC Spring 2007 Schedule of Classes.
- ❖ **Aesthetics:** Believe it or not, mathematicians often talk about a "beautiful" or "elegant" method of solving a problem. Through class discussion and individual exploration, it is hoped that students will find aesthetic experiences in their mathematical work.

Official Program SLOs

- ❖ Use rounding and estimation in applications of arithmetic.
- ❖ Add, subtract, multiply and divide fractions and mixed numbers and decimals.

YOU SHOULD KNOW

✓ ATTENDANCE REQUIRED AT FIRST CLASS MEETING!

Protect your seat by attending the first class meeting. Students not present when the roll is called during the first class may be dropped from the class by the instructor. Often instructors make those seats available to other students asking to add the class.

✓ ABOUT CLOSED CLASSES

If the class you want is "closed" or full, check the online class schedule periodically for an opening. Another student may drop the class creating a space for you. Additionally, there may be another section that is convenient for you. There is also the option of attending the class you want on the first day to see if seats become available due to other student "no shows."

✓ PROTECT YOUR GPA Drop a Class You're No Longer Attending

It is your responsibility to officially withdraw from a class you have stopped attending. Failure to withdraw may result in an "F" or "NC" grade. Protect your GPA!
