Course Description

The second semester of the sequence, Physics 007 is designed for majors in Health and Life Sciences, Architecture, and all those needing a one-year course in college physics requiring trigonometry but not calculus. This course examines the later developments of physics leading through electricity and magnetism to optics, relativity and quantum theory, atomic and nuclear physics.

Student Learning Outcomes

INSTITUTIONAL OUTCOMES (SLOs):

- A. **CRITICAL THINKING:** Analyze problems by differentiating fact from opinion, using evidence and sound reasoning to specify multiple solutions and their consequences.
- C. **QUANTITATIVE REASONING:** Identify, analyze, and solve problems that are quantitative in nature.
- F. **TECHNICAL COMPETENCY:** Utilize the appropriate technology effectively for informational, academic, personal, and professional needs.

PHYSICS DIVISION PROGRAM OUTCOMES (SLOs):

1. Develop critical thinking skills and move toward autonomous learning.
2. Comprehend, describe, and apply the procedures of physics and understand their limitations.
3. Demonstrate competence in applying the methods of scientific inquiry.
4. Apply the basic physics principles to a wide/diverse range of problems.

Grading:

- **Lecture Exams (3) → 20% of grade each (lowest score will be dropped)**
- **Final Exam (1) → 30% of grade**
- **Homework → 15% of grade**
- **Labs → 15% of class grade**
- **Extra Credit → up to 5% of course grade**

Grading Scale:

A 88% and higher **B** 76-87% **C** 64-75% **D** 51-63% **F** 50% and below

Extra Credit (you may earn up to 5% extra credit for the entire course).

Attendance: 3% (perfect attendance), 2% (1 absence), 1% (2A),
0% (more than 2 A); **Tardy counts as absence for extra credit count.**

Other forms of extra credit TBA

Student Responsibilities: Physics is a difficult subject. For many of you, this will be one of your most challenging courses. Expect to spend an average of 6 hours per week (in addition to in-class time) on homework and review for this class. If you are having difficulty, you may work with a fellow classmate, utilize the tutoring center, or e-mail or see me in my office for additional help.

Homework: To be assigned by homework sets in [mastering physics](#). Your instructor will demonstrate how to set up an account and navigate the page on the first day of class. All homework assignments will be done on this site. Homework solutions for the book problems will be given the day after they are due.

Exams: There are NO makeup exams in this class. Your lowest lecture exam will be dropped. You MUST take the final exam in order to receive a grade for the class.

Class Participation: One participation point earns you 1% for class participation. Participation counts as 3% of your grade. Participation opportunities will be announced in class. Every two participation points earned beyond the required 3 points will earn you extra credit on the exams. (up to 5% per exam and 10% total for exams).

TO SUCCEED AND OBTAIN A GOOD GRADE IN THIS CLASS – YOU MUST:

- 1. Attend class regularly, attending all class sessions. Get to class on time, every time, and stay the whole time. You are responsible for information, test announcements, date changes, etc. – whether or not you are present.**
- 2. Complete assignments on time. You have may have one to one and a half weeks to complete one unit. I will not extend a due date if you wait until the last day to begin the assignments.**
- 3. Take at least 2 of the in-class tests and the Final Exam (I highly recommend planning to take all tests in case of unforeseen emergencies, or just to try to pull your grade up) on the days listed above - No make-ups!**
- 4. You are responsible for credit and enrollment status. You are responsible to drop the class – if you choose not to continue. (Note: you may be excluded if you are consistently absent or tardy). Last day to drop the class without a “W” is Feb 20, (with a ‘W’, May 8). Students failing to follow the correct procedure for withdrawal will receive a grade “F” for the course, which will affect your GPA. Also note the new policy of only three repeats per class.**
- 5. Each student is expected to do his/her own work on all tests. Academic dishonesty, or cheating, will result in a zero grade on that test (which will not be dropped), plus (in cases of continued academic dishonesty) a filing of a report with the Science Chairperson or Dean of Students giving your name and describing the incident.**
- 6. Expect to work hard. You will need to spend at least 6-8 hours per week to complete the required reading and review of material taught in class. Do not wait until the last minute to start assignments. This will result in incomplete assignments and you will not have sufficient time to absorb the material.**
- 7. Please turn off your cell phone before entering the class, and do not eat inside the NEW classroom. You may bring water bottles. You may use your cell phones during breaks.**
- 8. In taking this class, you are agreeing to abide by all the rules and regulations stated above – including dates of tests and final. This means that you do not schedule anything else on test days.**
- 9. Welcome to Physics 007!!**

** If you are a DSPS student requiring special accommodation for this class, please contact me after class during office hours during the first week.
