

West Los Angeles College

Fire technology Program-Ft 203 Fall 2013 Section # 1100 (3) units course work

There are no Pre-requisites, co-requisites, and/or advisories for this course.

This course meets Mondays and Wednesdays in general classroom 470 at 0800 to 0935 hours. Students are expected to attend every class session, to arrive on time and stay throughout the class period. Students may be dropped from class for excessive tardiness, or for failure to attend class the first day or during the entire first week of the class or if the total number of absences exceed twice the number of hours the class meets per week)

On-line students are required to enter and complete a reading assignment, review of a module or exercise and/or final weekly throughout the semester.

Course description –Fire detection, alarm, and protection systems. For public safety departments and other agencies that cross train law enforcement and fire suppression personnel.

FT 203 - Fire Equipment and Systems is a required core course for the fire technology program. This is an On-line and On-campus course using the Etudes system designed to bring to you the opportunity to take college courses and conduct your studies around your own personal schedule.

This course is one of the 6 required core classes for the Fire technology program. The goals and objectives for the course as well as the course content has been approved State-wide for fire fighters by the California State College Chancellor's and the Office the California State Fire Marshal as well as the National Fire Higher Education Committee and the West Los Angeles college committee.

Course learning Objectives:

- * Describe how each of the approved portable fire extinguishers operate and how often servicing is required.
- * Demonstrate in writing your knowledge of the design and operation principles of various types of fire protection systems
- * Describe the basic elements of a public water supply system including sources, distribution networks, piping and Hydrants
- * Identify three different types of fire detectors and explain how they detect fires.
- * Review in writing the history and evolution of fire protection extinguishing systems and explain how they have been developed throughout the years

Some or all of the above course objectives may be used as a measure or assessment of student retention of course materials for this course. One or more of the 5 written assignment questions may be selected to be used to assess student success in this course.

Required text book:

Fire Detection and Suppression systems, 4 th edition, Oklahoma State University, ISBN 987-0879393984 Available at the College book store.

Recommended text book: NFPA handbook 20 th edition, National Fire Protection Association, 2008. Students should review sections 10 (all chapters) & section 11 (all chapters). A copy is available for loan in the Instructor's office .

EXERCISES : There are 9 exercises with fill-in questions and multiple choice questions for each chapter of the book. You will find the exercises in Etudes-NG on the left hand side under assignments, tests and surveys, answer all the questions.

All West Los Angeles College Policies and regulations are strictly adhered to in on-line classes. A copy of these policies can be found in the course schedule, in the College Library and on-line as well.

For example-

“Violations of academic integrity of any type by a student provides grounds for disciplinary action by the instructor or college. Violations of Academic Integrity include, but are not limited to, the following actions: cheating on an exam, plagiarism, working together on an assignment, paper or project when the instructor has specifically stated students should not do so, submitting the

same term paper to more than one instructor, or allowing another individual to assume one's identity for the purpose of enhancing one's grade. For more information on the Standards of Student Conduct refer to the college catalog available in hardcopy and online at www.lattc.edu.
