July 25, 2011:

1) That the President, with the help of Michelle Long-Coffee, address the need for posting minutes, agendas, and documents for college wide committees and how this will get done on the college web site in the short-term.

2) Have the President work with College Council to look at the entire college website as a whole to make it more user friendly and attractive. This should also be brought to Technology Committee as a recommendation.
