## **Suggestions:**

Because this is an online course students must be able to mostly learn on their own, and must be highly motivated. In order to achieve success in this course, regular and active participation in online assignments are extremely important. I expect your assignments and exams to be both timely and punctual. Closed chapters will not be reopened or extended. You should anticipate at least 10 hours of study and assignment completions for each chapter

After reviewing chapter material and objectives, complete your assignments in the order of:

- 1) Learn Smart – Students have unlimited attempts to get a 100% grade. You “should”, complete the LearnSmart module of each chapter before working on the Homework and Exam assignments. However and please note, the due date for submission of LearnSmart grading will be open until the end of the course.
  
- 2) Homework - These assignments are made up of Quick Study, Exercises, and Problems contained in the text. Students have unlimited attempts to obtain a 100% grade for work submitted. However, opening and closing dates will be strictly followed. Late work for will not be graded.
  
- 3) Exams - Designed to test the students understanding of LearnSmart and Homework assignments in support Student Learning Outcomes (SLOs). Exams are made up of 50 true/false and multiple-choice questions with one attempt per question in the time frame outlined in the chapter policies. Late work will not be graded for exams.

Be sure to check your exam settings to know due dates, time limits, attempts, answers, solutions etc. If there is something you do not understand, prepare specific questions to post to the “Class Discussion” area. Make sure you schedule your time accordingly.
