The new joint transfer program is an alternative path for students to transfer between a California Community College and a California State University. These unique degrees allows students to complete 60 units at a California Community College AA-T/AS-T degree, then complete 60 units at a California State University to receive your bachelor's degree. **Note:** Admissions to a CSU campus is guaranteed, but not specifically to your first choice campus. Students must follow the CSU Breadth or IGETC general education pattern.
