

Data Science Essentials

Certificate of Achievement
CSU transferable

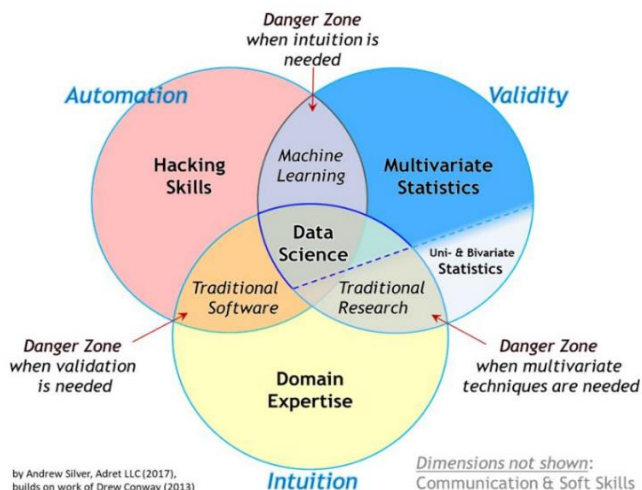

Job Ready

Prepares the student by providing the basic skills in highly sought-after professional career pathways. This program gives students exposure to skills in analyzing data for actionable insights. Students will practice identifying the data-analytics problems and producing solutions that offer the greatest opportunities for various organizations, by determining the correct data sets and variables. Students will be practicing with large amount of data using various tools such as those that are available as Python libraries. This certificate is a stackable certificate that may lead to a Certificate of Achievement in Data Science.
