

Fundamentals of Athletic Training & Sports Medicine

Certificate of Achievement
UC and CSU transferable

Job Ready

Part of a CTE-stackable certificate program that introduces students to the healthcare fields of athletic training and physical therapy. An evidence-based practice approach during their academic course work and clinical experience. Clinical domains include emergency care, injury prevention, clinical diagnosis, therapeutic intervention, and the management of medical conditions. Education in these fields vary depending on which career path a student decides to take. They range from an associate, masters, or doctoral degree. Obtaining an Associate in Science degree in ATSM will only allow a student to seek employment as a physical therapy assistant/aide. However, the program is designed to encourage students to continue to pursue graduate school and terminal degrees in these fields of study.
